

6.25 $\overline{005111}$

Having 4 base - Subcase of 6.19.

6.19.

Consider the following case:

① $\triangle \geq \triangle \geq \triangle$

(By symmetry $\triangle \geq \triangle \geq \triangle$)

$\triangle > \triangle$

Asym

Asym

Asym

$3 \times 2 = 6$

② $\triangle \geq \triangle = \triangle$

(By sym, ~~$\triangle \geq \triangle \geq \triangle$~~ $\rightarrow \triangle \geq \triangle \geq \triangle$)

Asym.

Asym.

$2 \times 2 = 4$

③ $\triangle \geq \triangle \geq \triangle$ and (by symmetry $\triangle \geq \triangle \geq \triangle$)

$\triangle > \triangle$

$\triangle = \triangle$

Asymmetry.

5 cases

$6 + 4 + 5 = 15$ cases.

4 cases.

2 cases

$2 \times 2 = 4$
